## Treasurers' Sales of Lands for Taxes

Each year, municipal and county treasurers compile a list of properties against which taxes are outstanding for at least two successive years, which is a period sufficient to permit sale of the owner's assets to reimburse the municipality. These lists are submitted by the municipal representative to the Ministry of Government Services for publication in THE ONTARIO GAZETTE.

The Gazette is published every Saturday. Tax sale lands are included only in the issue of the first Saturday of each month. Each property is described so that it may be properly identified. Also shown are the amount of tax arrears and costs, and the date, time and place where the sale will be held, which is usually in a public building in the locality. Sales are held three months or later following the date of publication in the Gazette and are subject to a reserve bid equal to the amount of tax arrears and costs.

The previous owner may by law redeem the property any time within one year and one day after the date of tax sale by paying to the municipality all arrears plus costs levied. Where redemption occurs, the municipality reimburses the purchaser of tax sale lands for the amount paid at the sale plus an additional amount to be determined in each case.

If the land is not redeemed in the manner described above, the purchaser at sale, receives from the municipality a tax deed or certificate which should be registered in the appropriate Land Titles or Registry Office. A purchaser should ascertain from either of these offices, information relating to any of the charges or liens against the land and consider the advisability of employing the services of a solicitor to determine the extent, if any, of his liability.

The foregoing applies to tax sale lands which were privately owned. In the event the land is the property of the Crown as represented by the Province of Ontario, only the improvements on the property, such as buildings, may be sold. In this case, an intending purchaser should for his own protection ascertain from the local office of the Ministry of Natural Resources whether or not the land or any part can be purchased or leased from the Ministry. If it cannot, then the purchaser of the improvements would be required to remove them from the land.

In some cases, land advertised for sale in the Gazette may be bought by the municipality, or the owner, prior to sale, may pay the tax arrears and costs. Where this occurs, the land is removed from the tax sale lists.

IN THE MATTER OF Certificate dated the 27th day of January, 1978; and

IN THE MATTER OF Reasons for Decision dated the 12th day of May, 1978 as issued by the Ontario Highway Transport Board.

#### NOTICE OF MOTION

TAKE NOTICE that pursuant to Section 17 of *The Ontario Highway Transport Board Act*, Loomis Courier Service Ltd./Service de Courrier Loomis Ltee, intends to move the Ontario Highway Transport Board (the "Board") on a date to be fixed by the Chairman of the said Board for an Order directing:

- (a) a review of its certificate dated the 27th day of January, 1978; and/or in the alternative,
- (b) reargument before the same Member of the Ontario Highway Transport Board as was seized with the original application; and/or in the alternative,
- (c) a rehearing either in whole or in part of the foregoing application resulting in the aforesaid certificate; and/or in the alternative,

- (d) for such further or other Order as the Ontario Highway Transport Board may deem fit on the following grounds:

The Learned Panel erred as follows:

- (a) by failing to take into consideration the fact that there is no licensed carrier in the Province of Ontario at the present time offering a service capable of being used by banks and trust companies on traffic weighing up to 1,000 pounds;
- (b) by failing to provide to the said banks and trust companies a licensed carrier capable of handling the type of traffic tendered by such institutions in a manner satisfactory to said institutions;
- (c) in its failure to consider the public interest in permitting the most appropriate type of equipment for any carrier in the Province of Ontario bearing in mind particularly the concern of the Select Committee of the Province of Ontario as to fuel conservation and energy-efficient transportation;
- (d) in the failure of the Sitting Panel to consider the evidence of the Applicant as to the most appropriate equipment to be used in serving the public which it serves in the Province of Ontario.

AND TAKE NOTICE that in support of this Notice of Motion will be read the Reasons for Decision, exhibits filed and argument by counsel on behalf of the Applicant and such further and other material as counsel may advise and this Honourable Board may permit.

**Taggart Service Limited, 02421**  
885 Churchill Avenue,  
Ottawa, Ontario.

IN THE MATTER OF *The Ontario Highway Transport Board Act*, R.S.O. 1970, Chapter 316, Section 17; and

IN THE MATTER OF the review of Taggart Service Limited, heard by the Ontario Highway Transport Board on November 8, 1976, at 10 a.m. (E.S.T.), at its Chambers, 151 Bloor Street West, Toronto, Ontario.

## NOTICE OF MOTION

TAKE NOTICE that the Intervening Carriers in this proceeding, Smith Transport Co. Limited, Direct Winters Transport Limited and Glengarry Transport Limited, by their respective counsel, shall bring a Motion before the Ontario Highway Transport Board upon such date, and at such time and place as the Board may direct for an Order directing the revocation of the decision of Vice-Chairman G. C. Marrs, dated February 15th, 1978, in this matter, and for a further Order of the Ontario Highway Transport Board directing the rehearing of this review proceeding in its entirety before a panel of the Ontario Highway Transport Board comprised of other than Vice-Chairman G. C. Marrs, or for such further or other Order as the Board may deem just, upon the following grounds:

1. That the decision of the panel dated February 15th, 1978, attributes an interpretation to the operating authorities of Taggart Service Limited which is totally contrary to the weight of all evidence before the panel in the review proceeding.
2. That having found as a fact that the operating authority of Taggart Service Limited before the Board in review proceedings was a local licence, specifically prohibited from being used in any form of inter-city operation, the panel then allowed an interpretation which is contrary to the earlier decisions of the Ontario Highway Transport Board in respect of the creation of the same licence.
3. That in rendering the decision, the panel has, in review proceeding, created a new licence for which there is no evidence upon which a finding of public necessity and convenience can be based; and in creating a new service, has without proper notice to the public, expunged from the operating licence a pre-existing prohibition against the use of the licence in respect of other than local transportation service.
4. That the decision is contrary to the intent and purpose for which the operating authority under review was originally issued, and the decision of the panel is beyond the jurisdiction of the Board in proceedings taken pursuant to Section 17 of *The Ontario Highway Transport Board Act*, R.S.O. 1970, Chapter 316.
5. And upon such further and other grounds as counsel may adduce and this Honourable Board may permit at the hearing of this Motion.

AND TAKE NOTICE that in support of the said Motion will be read the decision of the Ontario Highway Transport Board dated February 15, 1978, and the written argument submitted in respect of the said review proceedings, the transcript of evidence of the proceedings in respect of the

application of Taggart Service Limited, heard by the Ontario Highway Transport Board on April 15th, 1976, filed with this Board in this review proceeding, and such further and other material as counsel may deem appropriate and this Honourable Board permits.

Dated at Toronto, this 24th day of May, 1978.

# The Environmental Assessment Act, 1975

MTC-12/2

THE ENVIRONMENTAL ASSESSMENT  
ACT, 1975

## Exemption Section 30

Having received a request from the Minister of Transportation and Communications and the Minister of Natural Resources that an undertaking, namely:

Phase I of the Development Plan for the Puslinch Crown Resource Management Area consisting of the following activities:

1. Stripping of overburden and placement into berms;
2. Extraction, above and below water table, of 200,000 tons of aggregate;
3. Crushing of the above-noted extracted aggregate material;
4. The stockpiling and/or utilization of all or any part of the above-noted aggregate material on road works until exhausted;
5. Provision of ingress and egress to and from King's Highway #401 for M.T.C. contracts;
6. The placement of topsoil, refurbishing vegetation, soil stabilization materials and the implementation of final grading activities all being consistent with the attainment of the rehabilitation of the site;

be exempted from the application of the Act pursuant to Section 30; and

Having been advised that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

1. The Crown will be interfered with and damaged by the indeterminate delay of a project which has the following benefits—
  - the creation of a demonstration site to personnel of the Ministry of Transportation and Communications, the Ministry of Natural Resources, the Aggregate Industry, the contracting industry and the public of a progressive and planned approach in the extraction and rehabilitation of a demonstration gravel extraction site,
  - the provision of a recreational pond for the unrestricted use by the angling public complementing the Sports Fisheries Programme of the Ministry of Natural Resources,
  - the enhancement of an area which is currently devoid of productive capacity because of the presence of an inadequately rehabilitated gravel pit,
  - the anticipated significant cost savings to the Ministry of Transportation and Communications due to the proximity of this gravel source to the King's Highway #401 resurfacing contract and the payment of royalty charges since the gravel is Crown-owned,
  - the anticipated savings to the Corporation of the Township of Puslinch and the Cor-

poration of the County of Wellington and possibly other municipalities who may utilize, at cost, the stockpiled crushed aggregate for road works under wayside permits,

- the resulting non-required use of local roads for haulage on M.T.C. contracts,
- the resulting non-required need to open a new wayside pit or pits,

and the following disbenefits:

- noise of crushing and extraction operations to adjacent landowners for a few months,
- increase in truck traffic during hauling operations by municipalities on local roads,
- the presence of a stockpile of crushed aggregate, which will be so located so as to be perceptible only to those utilizing a short section of Township road immediately adjacent to the stockpile.

2. The public will be interfered with by the delay in the benefits to be derived through the use of the site as a demonstration aggregate extraction area employing a planned and progressive approach in the extraction and rehabilitation of a demonstration of a gravel extraction site.

Having weighed such injury, damage or interference with the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act; I am of the opinion that it is in the public interest to order and do order that the undertaking is exempt from the application of the Act for the following reasons:

1. Planning commenced in January, 1974, before the proclamation of the Act, and contract documents for highway construction have been prepared based on the utilization of this source of aggregate.
2. The protection, conservation and wise management of the environment will be sufficiently provided for by the detailed planning procedures which have been conducted and the detailed contract documents which have been drafted to meet the spirit and intent of the Act.
3. The undertaking is unlikely to have any significant adverse effects on the environment and, therefore, the interference with the Ministry of Transportation and Com-

munications and the Ministry of Natural Resources programme as described which would be caused by the application of the Act would be undue.

4. This order is for the purpose of replacing order MTC-12 dated 24th day of May, 1977 and approved by O.C. #1463/77, as the necessary extraction of material to complete phase I of the Development Plan for the Puslinch Crown Resource Management Area and subsequent rehabilitation activities, could not be completed by the expiry date of December 31, 1977, due to freezing conditions in December which made extraction below the water table extremely difficult and forced the contractor to cease operations until the spring of 1978.

This exemption is subject to the following terms and conditions:

1. For those phases of plan implementation with the exception of Phase I, the joint proponents prepare and submit an Environmental Assessment.
2. The activities detailed at the beginning of this exemption order be substantially complete by June 30, 1978 except for the utilization of any remaining stockpiled material.
3. Ingress and egress to and from the property for the contracts of the Ministry of Transportation and Communications only be by an opening onto King's Highway #401.
4. Municipalities not be allowed to remove and use aggregate from the stockpiled source at any time except under the authority of a wayside permit issued by the Ministry of Natural Resources and no such permits be issued except with respect to material stockpiled as part of Phase I.

This Order comes into force and has effect on and after the day upon which it is signed.

Dated at Toronto, this 17th day of May, 1978.

GEORGE R. MCCAGUE,  
Minister of the Environment.

Approved by  
O.C. No. 1453/78

#### Schedule 15

#### SCHEDULE OF BENEFITS

**OHIP**  
**SCHEDULE OF BENEFITS**  
**PREAMBLE**

**A. General**

1. The rates listed in this Schedule of Benefits are the maximum payments which can be made by the Ontario Health Insurance Plan.
2. Insured medical services are limited to the services which are medically necessary, which are listed in this Schedule of Benefits and which are not specifically excluded by legislation or regulation (see Appendix A for a list of specific exclusions).
3. Additions, deletions or other modifications of the Schedule of Benefits require recommendation by the Ontario Health Insurance Plan. Such recommendations are made in consultation with the Ontario Medical Association.
4. This Schedule is a public document and frank discussion with patients regarding the listed rates is recommended.
5. Services not listed in the Schedule or which are listed as N.A.B. (not a benefit) or which are excluded as benefits by legislation or regulation, may be charged directly to patients or others requesting these services.
6. The principles governing proper professional charges are incorporated in the Regulations (Medicine) of the Health Disciplines Act.
7. Each medical practitioner who participates in the care of a patient is entitled to compensation commensurate with the services he renders.
8. Whenever possible, the medical practitioner should acquaint the patient or person financially responsible with his obligations to those concerned with his care. This is particularly important where supportive or concurrent care is rendered or when a consultation and/or procedure are being arranged.
9. Each medical practitioner participating in the care of a patient should render to the patient, or to the financially responsible party, an itemized statement of charges for professional services.
10. Each medical practitioner participating in the care of a patient should, on request, send a receipt to the patient for all payments made by him.
11. If fees are collected by an organized group, the name of the doctor rendering the service should be clearly shown on the bill or claim card.

## PREAMBLE

12. Claims may be submitted for services which a patient receives from the team of staff man, resident, intern and clerk in a teaching unit, provided that the conditions as set out hereunder apply.

On October 10, 1972, the Minister of Health confirmed that the joint recommendations of the College and the O.M.A. governing the charging of fees for services provided by interns and residents in clinical teaching units are acceptable to the Ministry of Health. In his letter the Minister made it very clear that he is looking to the College and the Medical Schools to ensure that the ethical rules governing these billing procedures are followed meticulously in all cases.

It has been carefully explained that the responsible staff man must be present in the clinical teaching unit at the time the services are rendered and must be identified to the patient at the earliest possible moment. No fees are to be charged for services given by the intern or resident prior to this identification taking place. The following rules are now in effect: —

When patient care is rendered in a clinical teaching unit or other setting for clinical teaching by a health care team, the physician responsible shall be personally identified to the patient. His relationship to the team shall be defined by the clinical teaching unit Director and his role must be known to the patient and other members of the team. He shall assume full responsibility for the appropriateness and the quality of the services rendered.

Specific regulations must vary with the service and form of care being delivered: —

- (a) In order to claim for physical procedures being carried out by an intern or resident, the responsible staff man must be in the clinical teaching unit and immediately available to intervene.
- (b) In psychotherapy where the presence of the staff man would distort the psychotherapy milieu, it is appropriate for the staff man to claim for psychotherapy when a record of the interview is carefully reviewed with the resident and the procedure thus supervised. However, the time charged by the staff man may not exceed the total time spent by him in both such interview review and in direct supervision.
- (c) In other departments or services, the staff man should only claim for visits on the days when actual supervision of that patient's care takes place through the presence of that staff man in the clinical teaching unit on that day. This, of course, involves a physical visit to the patient and/or a chart review with detailed discussion with the other member(s) of the health team.
- (d) In those situations where on a regular basis a staff member might supervise concurrently multiple procedures or services through the use of other members of the team, the total claims made by the staff man shall not exceed the amount that the staff man might make in the absence of the other members of the team.

Any claim rendered should be in the name of the responsible staff man.

13. Charges for missed appointments are not benefits of O.H.I.P.

## PREAMBLE

### B. Terms and Definitions

1. This schedule lists a code number opposite most items. Items which are not coded are identified either as U.V.C. or N.C.

U.V.C. — use visit codes applicable to the pertinent service and specialty.

N.C. — no code applicable. This service is not a benefit (N.A.B.) of O.H.I.P., and may be charged directly to patients.

For the surgery portion of this schedule, physicians submitting claims in coded form should add to the code numbers, the suffix A if they perform the procedure, the suffix B if they have assisted at the surgery or the suffix C if they have administered the anaesthetic.

For those diagnostic and/or therapeutic procedures which have both technical and professional components listed, the suffix A should be added to the code numbers when both components are being claimed, the suffix B when only the technical component is being claimed, or the suffix C when only the professional component is being claimed.

For diagnostic radiology, only one code is listed for each service, even though some of these services may be provided by non-certified radiologists. The code for services rendered by non-certified radiologists should be obtained by increasing the first digit in the listed codes by 5. Thus, for example, the code for the service listed as X001 but rendered by a non-certified radiologist would be X501 plus the appropriate suffix.

2. **Call or Visit:** is the service by a physician to or on behalf of a patient for assessment and/or treatment.

(a) **Office Visit:** may be for a consultation, repeat consultation, minor allergy consultation, general or specific assessment or re-assessment, intermediate or minor assessment rendered in the doctor's office.

(b) **Home Visit:** is a visit rendered to a patient in the patient's home. The services rendered may include any service, e.g. consultation, assessment or procedure, of the type normally done in a physician's office. The surcharges for emergency call with sacrifice of office hours and for Nights, Saturdays, Sundays and Holidays, when indicated, are only to be claimed for the first patient seen during each home visit.

(c) **Special Visit to the Office, Emergency or O.P.D.:** is a visit rendered to the first patient seen following arrival at the office (outside normal office hours) or hospital. The services rendered may include any service, e.g. consultation, assessment or procedure. The benefit for a Special Visit to the Office (outside normal office hours) applies whether or not the office is in the doctor's home. The surcharges for Emergency call with sacrifice of office hours or for Nights, Saturdays, Sundays and Holidays, when indicated, are only to be claimed for the first patient seen in each special visit. When additional patients are seen in the office under these circumstances, the appropriate office visit should be claimed for these patients. When additional patients are seen in the emergency or outpatient department under these circumstances, the appropriate benefit

## PREAMBLE

under "Emergency or O.P.D. — Doctor in Hospital But Not on Duty in the Emergency Department When Seeing Patient(s) in the Emergency or O.P.D." may be claimed. When a physician makes a special trip to the emergency department to see a patient and also admits the patient to hospital during the same visit, he may claim the special visit benefit of \$14.00 or \$21.00, depending on the time of day, plus the appropriate hospital visit benefit which may be \$5.04 (subsequent hospital visit) or \$12.60 (a general re-assessment). When a specialist provides the same services at the request of another physician, the total claim should be the consultation benefit plus, if applicable, \$7.00 for a special visit at Night, on Saturdays, Sundays or Holidays. In such cases no claim may be made for an assessment on admission to hospital as well as the consultation.

When services are rendered on an emergency basis at a site other than listed in this schedule (e.g. roadside, ski slope, etc.), benefits are applicable at the Special Visit to the Office rates for the first patient seen and at the regular office rates for services rendered to additional patients.

If a physician is called to pronounce a patient dead, a home or special visit (minor assessment) may be claimed.

- (d) **Nights, Saturdays, Sundays and Holidays:** an extra \$7.00 may be claimed in addition to the appropriate Home Visit or Special Visit to the office, Emergency or O.P.D. when the calls are received and made between the hours of 6:00 p.m. and 8:00 a.m. or on Saturdays, Sundays and Holidays. Only one such claim may be rendered per Home or Special Visit to the Office, Emergency or O.P.D. An extra \$7.00 may be claimed in addition to the appropriate Hospital visit on behalf of a registered bed patient when the calls are received and made between the hours of 6:00 p.m. and 8:00 a.m. or on Saturdays, Sundays and Holidays. Only one such claim may be made per Hospital visit. This surcharge does not apply to visits on regular rounds but rather applies to situations when a doctor is called to the hospital and makes a special trip to see a registered bed patient. When a special visit is made between 6:00 p.m. and 8:00 a.m. or on Saturdays, Sundays, and Holidays, \$7.00 may be claimed in addition to the appropriate consultation or visit fee when no other premium applies to the service provided. When a special visit is made between 6:00 p.m. and 8:00 a.m. or on Saturdays, Sundays and Holidays to perform a procedure (excluding non-referred or transferred obstetrics but including Caesarian sections), the listed procedural benefit may be increased by 10% or \$7.00, whichever is greater when no other premium applies. Only one such premium (code E409) may be claimed per special visit and it may not be claimed for non-emergency procedures or for procedures which mainly involve the interpretation of test results. It is not applicable to procedures in Diagnostic Radiology, Nuclear Medicine or Diagnostic Ultrasound.

## PREAMBLE

- (e) **Holidays:** are defined for the purpose of this schedule as New Year's Day, Good Friday, Easter Monday, Victoria Day, Dominion Day, Civic Holiday, Labour Day, Thanksgiving, Remembrance Day, Christmas Day and Boxing Day. If any of these holidays fall on a Saturday or Sunday, the Friday before or Monday following will be recognized as the holiday.
- (f) **Emergency Call:** is a call made in a situation (excluding non-referred or transferred obstetrics) where the demands of the patient and/or the physician's interpretation of the patient's condition is such that the physician responds immediately at the sacrifice of regular office hours. Only one \$7.00 claim may be made per home, hospital or special visit for sacrifice of office hours, and may not be claimed if a claim for the service also is made for the Night, Saturday, Sunday or Holiday surcharge.
- (g) **Hospital Visit:** is a visit to a registered bed patient. When the patient has not been seen previously by the physician in charge, the first visit after admission may be claimed as a consultation or general or specific assessment if appropriate. Where the patient has been previously attended before admission, the first visit after admission may be claimed as a general reassessment or specific reassessment if the patient has been seen before in the same illness depending on the specialty. (Such assessments or reassessments are considered to be the hospital "admission assessment" and may not be claimed more than once during a hospital admission.) Subsequent visits (routine and special) should be claimed at hospital visit rates. Claims for daily hospital visits must not be rendered unless a practitioner actually visits the patient each day.

Prior to the weekly and monthly limitations that apply after a patient has been in hospital for 5 weeks (6 weeks for paediatricians), payments for hospital visits generally are limited to one per patient per day. For acute illnesses or exacerbation of original illness requiring hospital visits after 5 weeks of hospitalization, claims for extra hospital visits should be made on an independent consideration basis. An extra \$7.00 may be charged for a special visit to a registered bed patient under the circumstances stated in paragraphs 2(d) and 2(f).

When a patient in hospital is referred by one doctor to another, the second doctor will not be limited by the Subsequent Hospital Visit formula for the number of hospital visits already rendered by the first doctor. In other words, the second doctor is entitled to claim for his visits up to five weeks just as if the patient was being attended to in hospital for the first time. However, if the patient is transferred to the care of another physician, the Subsequent Hospital Visit formula would apply just as it would if only one physician was involved in the care.

## PREAMBLE

- (h) **Outpatient or Emergency Room Visit:** is a visit to a patient who is not a registered bed patient. If the visit requires a special trip by the doctor, he may claim for his services under the listings for Special Visit to the Emergency or O.P.D. If the doctor is already in the hospital and sees the patient in the emergency or O.P.D. he should claim for his services under the listings for Emergency or O.P.D. — Doctor in Hospital But Not on Duty When Seeing Patient(s) in the Emergency or O.P.D. If a consultant is in the hospital and is requested by a doctor on duty in the emergency department to see a patient in consultation, the consultant may claim a consultation fee for this service. If the consultant is requested to perform this same service by a resident or intern, the consultant may claim a general or specific assessment fee according to his specialty. A doctor on duty in the Emergency Department regardless of his specialty should submit claims under the heading Emergency Department — Doctor on Duty.

When a doctor is on duty in the Emergency Department between 12:00 midnight and 8:00 a.m. and is required to suture a simple and uncomplicated wound only, the minor assessment at \$11.20 (H108 pg 23 of the schedule) should be claimed instead of the suturing benefit of \$9.80 (R076 pg 143 of the schedule). Doctors seeing patients in organized out patient departments should claim under the heading "Emergency or O.P.D. — Doctor in Hospital But Not on Duty in the Emergency Department When Seeing Patient(s) in the Emergency or O.P.D." (H prefix codes). This heading also should be used when a physician requests a patient to see him in the emergency department instead of his office (if the visit is for a procedure only, see paragraph 12).

### 3. Consultations:

- (a) A consultation refers to the situation where a physician, in light of his professional knowledge of the patient, requests the opinion of another physician competent to give advice in this field, because of the complexity, obscurity or seriousness of the case or because another opinion is requested by the patient or an authorized person acting on his behalf. The consultant is obliged to perform a general or specific assessment, review the laboratory or other data and submit his findings, opinions and recommendations in writing to the referring doctor.
- (b) For laboratory and procedural benefits connected with consultations, see listings of Diagnostic and Therapeutic Procedures and Laboratory Medicine.
- (c) A consultation is not to be claimed as such when:
- (i) The patient presents himself to a consultant's office without prior knowledge of the primary physician. The sending of a report to the primary physician under these circumstances does not justify a claim for a consultation.

**PREAMBLE**

- (ii) The primary physician is not asked for professional advice but is simply asked by the patient for the name of a specialist in a particular field and the patient seeks out the specialist himself.
- (d) A repeat consultation requires all of the criteria of a full consultation and implies interval care by the primary physician. The situation in which the consultant requests the patient to return for a later examination is not a repeat consultation.
- (e) A minor allergy consultation may involve all of the components of a major consultation but is less demanding in terms of time, i.e., requiring less than 30 minutes of the physician's time with the patient exclusive of testing; where the time spent with the patient is more than 30 minutes, the full consultation benefit applies.
- (f) A diagnostic radiology consultation applies when radiographs made elsewhere are referred to a radiologist for his written opinion or when a radiologist is required to make a special visit at Night, Saturdays, Sundays and Holidays to consult on the advisability of performing a diagnostic radiological procedure which eventually is not done. A consultation does not apply when the radiographs referred to above are used for comparison purposes with radiographs made in the consultant's facilities.
- (g) A diagnostic pathology consultation (\$12.60) applies when tissue slides are referred to a second pathologist for a written opinion. It includes secretarial or other assistance and does not apply when the tissue slides referred to above are used for comparison with tissue slides done in the consultant's facilities. When a diagnostic pathology consultation fee is claimed L821 may not also be claimed.
- (h) A pathology consultation or repeat consultation (\$25.20 and \$18.90 respectively) applies when a pathologist is requested to examine a patient and provide a written opinion.
- (i) A diagnostic nuclear medicine consultation (\$12.60) applies when nuclear medicine studies are referred to a nuclear medicine specialist for a written opinion. It includes secretarial assistance and does not apply when the studies referred to above are used for comparison with studies done in the consultant's facilities.
- (j) A nuclear medicine consultation (\$25.20) or repeat consultation (\$18.90) applies when a nuclear medicine specialist is requested to examine a patient and provide a written opinion, all of which takes a greater amount of time and effort than a nuclear medicine study would normally require. It may or may not be followed by a nuclear medicine study but if so, the lesser professional benefit ( $P_2$ ) rather than the greater benefit ( $P_1$ ) should be claimed in addition to the technical (T) benefit.

## PREAMBLE

- (k) Some nuclear medicine specialists have other specialist qualifications which allow them to claim other consultation benefits (e.g., internal medicine). A nuclear medicine consultation (\$25.20) or repeat consultation (\$18.90) may be claimed in lieu of another consultation (e.g., internal medicine) but would not be combined with a claim for such a consultation by the same consultant.
- (l) A prenatal consultation by a paediatrician applies when a physician considers a foetus of greater than 20 weeks gestation to be at risk or in jeopardy by reason of continuation of pregnancy in the presence of maternal and/or foetal distress, and requests the opinion of a paediatrician competent to give advice in this field. The paediatrician shall perform a general or specific assessment, review laboratory and other data and submit his findings and recommendations in writing to the referring doctor. Such a consultation does not preclude the paediatrician from a post-natal consultation on the infant.

4. **General Assessment:** shall comprise a full history, an enquiry into, and an examination of all parts or systems (and may include a detailed examination of one or more parts or systems), an appropriate record, and advice to the patient.\*

5. **General Re-Assessment:** shall comprise the same services as a general assessment except that the history need not include all the detail already obtained in the original general assessment.\*

6. **Specific Assessment:** shall comprise a full history of the presenting complaint, enquiry concerning, and detailed examination of the affected part, region or system, as needed to make a diagnosis, exclude disease and/or assess function, an appropriate record, and advice to the patient.\*

7. **Specific Re-Assessment:** shall comprise a full relevant history and physical examination of one or more systems but not requiring a comprehensive evaluation of the patient as a whole.\* Specific re-assessments in the medical specialties apply in the management of chronic disease and are not to be claimed for treating minor conditions (see definition of minor assessment). If a surgical specialist performs a second specific assessment on a patient within a year's time and the diagnosis is the same, the doctor should claim for this second service on the basis of a specific re-assessment.

8. **Intermediate Assessment:** is a more extensive assessment than a minor assessment and shall comprise a full history of the presenting complaint, enquiry concerning and examination of the affected part(s), region(s), or system(s) as needed to make a diagnosis, exclude disease and/or assess function, an appropriate record, and advice to the patient.\*

\*For laboratory and other investigation performed in conjunction with a visit, see Diagnostic and Therapeutic Procedures and Laboratory Medicine.

## PREAMBLE

**9. Minor Assessment:** shall comprise the necessary history, an enquiry concerning and the necessary examination of the affected part, region or system, an appropriate record and advice to the patient when the physician is consulted for a relatively minor condition or for subsequent visits solely for following the progress of treatment.\*

**10. Admission Assessments (to Long Term Care Institutions):**

Type 1 — applies when (a) no medical history has been provided to the admitting physician, (b) the admitting physician takes the history of past and present illness, carries out a general assessment and provides a report for the medical record.

Type 2 — applies when (a) the report of the history and examination has been written by another physician, (b) the admitting physician reviews the report and decides it is necessary to repeat the history and general assessment and provides a report for the medical record.

Type 3 — applies when (a) there is a report of the history and general assessment made by the same (as the admitting) physician prior to admission or, (b) when the admitting physician writes an admission note describing the condition of the resident following admission.

**11. Documentation:** whenever a physician examines or treats a patient, an appropriate record of this service must be made and such record must be in keeping with section 28 of Regulation 577/75 of the Health Disciplines Act, 1974 (see Appendix B).

**12. Visit for Procedure:** when the sole reason for an office visit is the performance of a certain procedure, the listed benefit for the procedure will apply. (See Diagnostic and Therapeutic Procedures Preamble for exceptions.) When procedures are carried out in the office, emergency or outpatient department on an elective basis, a special visit should not be claimed in addition to the procedural fee. When procedure(s) are carried out under the direct supervision of the physician, the usual claims may be made for procedures(s) which are generally and historically accepted as those which may be carried out by the nurse or other medical assistant.

**13. Annual Health or Annual Physical Examination** (Including Primary and Secondary School Examinations): shall comprise all the elements of a general assessment as it pertains to an individual who presents and reveals no apparent physical or mental illness. To qualify for O.H.I.P. benefits, an Annual Health Examination must be requested by the patient rather than a third party (refer also to O.H.I.P. Bulletin #4093). O.H.I.P. benefits are limited to one Annual Health Examination per patient per year after the sixth birthdate, one Primary School Examination per patient per lifetime and one Secondary School Examination per patient per lifetime.

\*For laboratory and other investigation performed in conjunction with a visit, see Diagnostic and Therapeutic Procedures and Laboratory Medicine.

## PREAMBLE

14. **Newborn Care:** is the routine care of a well baby up to ten days of age and should include a complete physical examination of the baby and necessary instructions to the mother. The service shall involve at least two visits.

15. **Premature (low birth weight) Care:** is the care of a baby weighing less than 2.5 kilograms at birth.

16. **Well Baby Care:** the periodic visits of a well baby during the first two years of life involving complete examination with necessary weight and measurements, haemoglobin and urinalysis (when indicated), necessary immunizations and instructions to the parent(s) regarding health care. O.H.I.P. benefits are limited to ten such visits.

17. **Well Child Care:** is the routine care of a well child between the second and sixth birthdays including necessary immunizations and instructions to the parent(s) regarding health care. O.H.I.P. benefits are limited to one such visit per year.

18. **Supportive Care:** is the care rendered in hospital by the referring physician, who is not actively treating the case (e.g. writing orders), to a patient under the care of another physician, at the desire of the patient or family, for purposes of liaison or reassurance. The physician may claim for this care on a per visit basis. It is reasonable to assume that one visit every two days to the seventh day and then one visit every four days thereafter will be sufficient. If medical complications develop or are present in the post-operative period which require active management by the referring physician, claims for hospital medical care should be rendered, not supportive post-operative care.

19. **Most Responsible Physician:** is the attending physician who is primarily responsible for the day to day care of the patient in hospital. In cases of unusual severity where the consultant assumes the role of the most responsible physician, the consultant may claim on a per visit basis and the family physician may claim supportive care. Where the family physician remains the most responsible physician and requests only a consultation, the family physician may claim on a per visit basis and the consultant may claim for a consultation only.

20. **Multidisciplinary Care:** is where the complexity of the medical condition requires the services of several physicians in different disciplines. In such cases, each physician should render a separate claim on a per visit basis. This does not refer to a situation where a single benefit for a team of physicians is listed in the Schedule.

21. **Concurrent Care:** is where the family physician remains the most responsible physician but because of the seriousness or complexity of the condition, requests continued directive care by a consultant, the family physician may claim on a per visit basis and the consultant may claim for one visit every two days for the first week and then one visit every four days while the patient's condition remains serious — this arrangement being agreeable to both physicians.

## PREAMBLE

### 22. **Transferral and Referral:**

- (a) A referral takes place when one physician or surgeon requests for his patient the services of another. The services of the latter may consist of:

- (i) an opinion (i.e. a consultation)
- (ii) diagnostic tests or procedures (e.g. skin test, biopsy, etc.)

Note: In such cases the referring doctor continues to treat the case himself.

- (iii) treatment (surgical or medical).

- (b) A transferral, as distinguished from a referral, takes place where the responsibility for the care of the patient is completely transferred permanently or temporarily, from one physician to another in the same field or specialty (e.g. where the first physician is leaving temporarily on holidays and unable to continue to treat the case). In such cases, the physician to whom the patient is transferred is not entitled to claim for a consultation. Doctors who are substituting for other physicians should consider that patients of the latter have been temporarily transferred (not referred) to their care. Where the care of the patient involves a benefit containing several components such as for surgery or obstetrics the doctors may consider the surgical or obstetrical benefit a team benefit and decide among themselves how each is to be compensated; traditionally doctors in these circumstances have reciprocated by exchanges of coverage for each other. When doctors routinely or frequently substitute for each other providing hospital visits to registered bed patients in active treatment hospitals, e.g. weekend coverage or daily rounds by various members of a group, the most responsible physician may claim for all the visits.

23. **Psychotherapy:** is any form of treatment for mental illness, behavioural maladaptations, and/or other problems that are assumed to be of an emotional nature, in which a physician deliberately establishes a professional relationship with a patient for the purposes of removing, modifying or retarding existing symptoms or attenuating or reversing disturbed patterns of behaviour, and of promoting positive personality growth and development. Accordingly, therefore, a psychotherapeutic procedure may be claimed for if a half hour or major part thereof has been spent in such treatment of the patient. Please note that the College of Physicians and Surgeons of Ontario has stated that the minimum time period for psychotherapy (to be claimed as such) is twenty minutes. In order to claim for a major portion of a second or subsequent time interval of psychotherapy for the same patient during the same visit, the preceding time interval must be a full 30 minutes of psychotherapy.

## PREAMBLE

### 24. **Age:** (unless otherwise specified)

Newborn — (see item 14 above)

Premature — (see item 15 above)

Infant — up to 2 years

Child — up to and including 15 years

Adolescent — up to and including 17 years

Adult — 18 years or over.

25. **Detention:** benefits may be applicable for detention when under very exceptional circumstances a physician is required to spend considerable extra time with a patient. Such extra time must be required *at that time*, and it must be to the exclusion of all other work.

Claims for detention should be made on an "I.C." basis according to the following guidelines:

\$8.40 per quarter hour or part thereof after the first twenty minutes provided that the first twenty minutes are spent in a minor or intermediate assessment or subsequent hospital visit.

\$8.40 per quarter hour or part thereof after the first forty minutes provided that the first forty minutes are spent in a specific or general re-assessment or multiple system assessment.

\$8.40 per quarter hour or part thereof after the first hour provided that the first hour is spent in consultation, repeat consultation, specific or general assessment.

Detention is not meant to apply to procedures and does not include time waiting for X-rays, lab reports or for the operating room. Moreover, since the pertinent listed obstetrical benefits take attendance at labour into account, benefits for detention are not applicable during the first 18 hours of established labour. For the purpose of counting the hours in established labour, a physician should start counting either from the time he has been advised by the hospital that his patient is in active labour (which may be the time of hospital admission) or from the time that he has assessed the patient and found her to be in active labour. If established labour extends beyond 18 hours, a physician may claim detention for further time during labour spent with and on behalf of the obstetrical patient to the exclusion of other patient care.

26. **Independent Consideration — "I.C.":** independent consideration will be given by O.H.I.P. for those items in the Schedule of Benefits which are listed as I.C. Claims rendered under this heading must include a specific charge along with an explanation of that charge.

27. **Specialist:** a specialist shall be defined (for purposes of application in the case of any given service within this Schedule) as one who holds a certificate from the Royal College of Physicians and Surgeons of Canada in the specialty which normally is considered to encompass the service in question.

## PREAMBLE

### 28. Differential Benefits:

- (a) The rates listed under the column "Practice in General" are those intended to apply when the service is performed by other than a physician certified in the specialty normally considered to encompass the service in question.
- (b) Where only one benefit is listed, it shall apply to any physician rendering the service, regardless of specialty.
- (c) Consultation and visit benefit listings under the heading of General Practice may be claimed by other branches of medicine if the listings do not appear elsewhere in the Schedule.
- (d) Specialists in paediatrics who practice allergy may claim specialist rates for their allergy services regardless of the age of their patients.

### 29. Referring Physician's Services:

- (a) For the services rendered prior to an operation, the referring physician should claim on a "fee-for-service basis", for example:
  - (i) Home, Office or Hospital Visits as rendered.
  - (ii) In addition to (i) above, in acute cases, benefits may be claimed for detention if applicable and appropriate (refer to paragraph 25, above).
- (b)
  - (i) For services rendered as an assistant during the operation, the referring physician should claim in accordance with paragraph 30, below.
  - (ii) In cases in which the referring physician is required to be present in the interest of the patient but does not actually assist at the surgical procedure, he should charge on a per visit basis for this service.
- (c) For the services rendered after the operation, the referring physician may claim on the basis of supportive care as outlined in the Schedule.

### 30. Assistants' Services:

- (a) Benefits for assistants' services are determined by adding the listed basic units and time units and multiplying the total number of units by \$4.20. For cases commencing after 6.00 p.m. and before 7.00 a.m. or on Saturdays, Sundays and Holidays, the total benefit for assistants' services is increased by 30% (E400B).
- (b) The time units are computed by allowing one unit (\$4.20) for each 15 minutes or part thereof of time spent by the assistant. Time for purposes of these calculations includes scrub time and time spent in the operating room. If claims are being made in coded form (see explanatory comments at front of Schedule), the suffix B should be added to the code for the procedure.

## PREAMBLE

- (c) When multiple or bilateral surgical procedures are done during the same anaesthetic, the assistant's benefits shall be based on the basic units for the major procedure plus time. When bilateral procedures or surgical revisions are carried out at separate times with separate anaesthetics, the assistant shall be entitled to receive full assistant's benefits for each procedure.
- (d) In surgical procedures requiring more than one assistant, benefits for the second assistant shall be computed on the same basis as for the first assistant.
- (e) When a surgeon requires an assistant at a procedure for which no assistant's units are listed, the assistant may calculate the benefits applicable by taking the number of basic units used by the anaesthetist, adding his time units and multiplying the total number of units by \$4.20. (See also (f) below.)
- (f) When assistants at surgery claim for procedures for which no assistants' units have actually been listed in the Schedule, the assistants should support their claims with letters of explanation as to why their attendance was required.
- (g) Where the attendance of a physician is requested by the patient's other medical attendants for the sole purpose of monitoring or special supportive care, and when the physician is in constant attendance, the benefits shall be based upon 3 units plus time (E003B).
- (h) When an anaesthetic has begun and the operation is cancelled due to a complication prior to commencement of surgery, the assistant who has scrubbed but is not required to do more, should claim 3 basic units plus time units (E006B). If the operation is cancelled after surgery has commenced, the procedural basic units plus time units will apply. If the procedure is cancelled prior to the induction of anaesthesia and the assistant is scrubbed, a subsequent hospital visit only may be claimed.

### 31. Anaesthetists' Services:

- (a) Benefits for anaesthetists' services are for all types of anaesthesia. The rates listed are for professional services, including pre-anaesthetic evaluation and post-anaesthetic follow-up and all immediate supportive measures, and does not include the cost of materials used. If an anaesthetist is asked to see a registered bed patient in consultation more than 48 hours prior to the administration of an anaesthetic, he may claim for a consultation as well as for rendering the anaesthetic. If an anaesthetist examines a patient prior to surgery and the surgery is cancelled prior to the induction of anaesthesia, he may claim a subsequent hospital visit for this service. When an anaesthetic has begun and the operation is cancelled due to a complication prior to the commencement of surgery, the anaesthetist should claim 4 basic units plus time (E006C). If the operation is cancelled after surgery has commenced, the procedural basic units plus time units will apply.

**PREAMBLE**

- (b) Benefits for anaesthetists' services are determined by adding the basic and time units together and multiplying the sum by \$5.08 for certified anaesthetists and \$4.41 for non-certified anaesthetists. For cases commencing after 6.00 p.m. and before 7.00 a.m. or on Saturdays, Sundays and Holidays, the total benefit for anaesthetists' services is increased by 30% (E400C).
- (c) Basic units are listed for most procedures and include the value of all anaesthetic services except the actual time spent administering the anaesthesia, any modifying factors, or unusual detention with the patient (see paragraph 31(1) below).
- (d) Except during maintenance of continuous conduction anaesthesia time units are computed by allowing one unit for each 15 minutes or part thereof of anaesthesia time. Anaesthesia time begins when the anaesthetist is first in attendance with the patient for the purposes of creating the anaesthetic state and ends when he is no longer in personal attendance (when the patient may be safely placed under customary post-operative supervision).
- (e) If claims are being made in coded form (see paragraph B1 above) the suffix C should be added to the code for the procedure.
- (f) In special cases where the services of more than one anaesthetist are deemed necessary in the interest of the patient the benefits shall be increased by 50% of that computed for the procedure; each anaesthetist to be entitled to one half of the total benefit.
- (g) When multiple or bilateral surgical procedures are done during the same anaesthetic, the anaesthetic benefits shall be based upon the basic units for the major procedure plus time. When bilateral procedures or surgical revisions are carried out at separate times with separate anaesthetics, the anaesthetist shall be entitled to received full anaesthetic benefits for each procedure.
- (h) In procedures where no units are listed or with I.C., the basic units will be based upon those listed for a comparable procedure considering region and modifying conditions or techniques.
- (i) When a pump with or without an oxygenator and with or without hypothermia is employed in conjunction with an anaesthetic, the anaesthetic "Basic" will be 35 units; this replaces the listed basic units for the procedure. To compensate for variations in anaesthetic practice, special respiratory intensive care or detention for the purpose of intensive treatment of other types may be claimed separately under the appropriate headings.
- (j) For controlled hypotension using a specific technique to produce adrenergic blockade in association with an anaesthetic, add 10 units to the basic units. The extra 10 units may be claimed under code E004C.

**PREAMBLE**

- (k) Where unusual detention with the patient before or after anaesthesia is essential for the safety and welfare of such patient, the necessary time will be valued on the same basis as indicated for the anaesthetic time.
- (l) For detention not associated with anaesthesia detention rates and criteria apply (see paragraph 25, above).
- (m) Where the attendance of the anaesthetist is requested by the patient's other medical attendants for the purpose of monitoring or special supportive care, and where the anaesthetist is in constant attendance the benefits shall be based upon 3 units plus time. If claims are coded, the code is E003C.
- (n) A doctor, regardless of specialty, who is required to examine a patient in preparation for dental surgery under general anaesthesia may claim \$12.60 when he has seen the patient in the previous twelve months for a general assessment or \$17.50 if he has not seen the patient within the previous twelve months for a general assessment. If the examining physician also administers the anaesthetic only \$12.60 may be claimed in addition to the anaesthetic benefit, for the history and examination required by the hospital on admission.
- (o) No additional claim should be made for introducing a catheter for continuous conduction anaesthesia, i.e. above the basic of 5 units plus maintenance units to a maximum of 6 units plus the number of time units required for the final delivery.
- (p) When a doctor administers an anaesthetic and/or other medication prior to or during a procedure(s) and also performs a procedure(s) on the same patient, he should claim for the procedure(s) only.
- (q) When hypothermia is used by the anaesthetist in procedures not specifically identified as requiring hypothermia, the basic value is 25 units. This basic value replaces the basic value listed in the Schedule for the procedure. When the basic value claimed is 25 units, the anaesthetic service may be claimed under code E002C.
- (r) Where one anaesthetist starts a procedure and is replaced by another part way through a surgical procedure or delivery, the first anaesthetist should claim the appropriate basic units plus time units and the second anaesthetist may claim for time units only (fee code E005C). E005C qualifies for the surcharge E400C only if the case originally started within the time stated under paragraph 31(b) above. Each anaesthetist should state on his claim card which part of the anaesthetic is being claimed and the time begun and completed.
- (s) General anaesthesia for the purposes of this Schedule includes all forms of anaesthesia except local infiltration.

**LABORATORY MEDICINE**

**Note:** Claims for laboratory services, when referred by a Dentist, Osteopath, Chiroprapist or Chiropractor are not insured services.

**PREAMBLE:**

1. The patient documentation and specimen handling benefit is applicable to all patients, except for those items listed under the anatomical pathology, histology and cytology sections. The items in this section have been left at a sufficient level to cover administrative costs. This benefit is not applicable to referred-in samples, since the collecting laboratory will already have claimed the patient documentation and specimen collection benefit.
2. The biochemistry section has been condensed so that one listing refers to a procedure for any of amniotic fluid (A), blood (B), C.S.F. (C), faeces (F), gastrointestinal fluid (G), urine (U). Exceptions are indicated by B, U, etc., following the test name. Other specimens will be considered on an I.C. basis.
3. A number of tests are listed in different sections of the schedule, i.e. when more than one method of performing the test is available, e.g. Hepatitis B antigen is listed under both Radioassays and Immunology.
4. Urine — dipstick chemical estimations are a modern and acceptable part of a routine and microscopic urine analysis (L253) or as a single part (such as Ketones, blood or protein, etc.) or in a glucose tolerance test (L254).

**Note:** Ketones should not be routinely claimed with G.T.T.

5. Blood glucose by the dipstick method may be claimed only when assessed by an appropriate instrument such as a reflectance meter. It should not be claimed when used only as a check on the fasting blood sample of a glucose tolerance test. The blood glucose of the fasting sample in a glucose tolerance test is allowable only once even if assessed by two methods.
6. If in the course of any visit, a hemoglobin is carried out in the doctor's office, no claim shall be made for this service unless it is the sole reason for the visit. Urinalysis may be claimed with or without an associated visit to a doctor's office if the analysis is comparable to code L253 and includes microscopic examination of the centrifuged specimen.
7. The RAST test has not been recognized in the schedule and it is inappropriate to claim for this service under code L585.
8. When a screening culture method (e.g. Agar spoon) is used on a urine sample, L641 refers to a culture technique and does not apply to those kits using the nitrite test only. Where a significant growth is obtained and followed up by definitive identification methods, L633 or L634 only should be claimed.
9. The physician assumes responsibility for all cytology smears and the listed professional benefits (L804 to L815 inclusive) are weighted averages of the

**LABORATORY MEDICINE**

professional component. These benefits, therefore, are applicable in each case whether or not all slides are examined by the physician.

10. Only those tests which are requested are to be claimed with the following exceptions. It is intended that if the test results yield abnormal findings or information which would be incomplete, insufficient or meaningless to the referring physician, the medical director of a laboratory may add further appropriate tests and claim for them with the knowledge he may have to substantiate their justification.
11. The verbatim listing is intended as the definitive benefit for that test alone, unless otherwise specified e.g. isoenzymes do not include total enzyme estimation; creatine does include creatinine (as specified). Notwithstanding the foregoing and recognizing that it is impossible to list all variations in techniques of all listed tests, when there is a modification of the usual technique, the listing most closely approximating it should be used.
12. This schedule, with the exception of L036, lists actual procedures performed. No claim shall be made for calculated values made and reported.
13. Whereas the red cell count had fallen into disrepute and was rarely used before the advent of particle counters, and since they are considered valid only when counted by such an instrument, the manual red cell count done by the counting chamber is no longer approved and has been removed from the schedule.
14. Because of obsolescence and/or lack of utilization, L028 (Bence Jones Protein heat test) and L138 (Iodine, Butanol Extractable) have been removed from the schedule.
15. The benefit for seminal fluid examination (complete) is to include sperm count, volume estimation, motility and morphology and viscosity. The benefit of \$2.576 for seminal fluid examination carried out post-vasectomy is not to be claimed by the operating surgeon unless the patient requires more than one office visit post-operatively.
16. Creatinine is a justifiable addition in the case of tests on 24-hour urine samples, where it is necessary to assess the sample as a complete 24-hour collection. However, if several tests (e.g. steroids) are done on a single such sample; only one creatinine should be claimed for that sample. In those estimations where the test result is expressed in terms of creatinine excretion (i.e. a certain quantity per m.g. of creatinine) the performance of a creatinine is mandatory and may be claimed.
17. It is recognized that in requests for a serologic titre, if a screening test is used and would suffice, the lesser benefit for the screening test should be claimed. If positive and followed by serial titration, both the screening and titre fees may be claimed. If the titration is a micro technique using plates, it is the equivalent of a tube titre, the wells being miniature tubes.
18. It is recognized that when Wet Preparation (L653) has been used to search for trichomonas, it may be claimed in addition to L625 or L627 provided that the

**LABORATORY MEDICINE**

conditions set down in paragraph 10 of this preamble are adhered to. The wet preparation used in the faeces concentration technique for parasites and ova is included in L650.

19. It is recognized that in all laboratory tests there is a professional component.
20. If a test is not completed in accordance with the specific schedule listing, no claim should be made for the test.
21. The maximum number of units which can be claimed for any combination of L418 (Hemoglobin), L417 (Hematocrit), L399 (WBC Count) and L397 (RBC Count) is 11 units, whether automated, semi-automated or manual methods are used. L700 is not included in this total and may be claimed separately, if appropriate. Code L470 has been deleted from this schedule. Laboratories using multichannel equipment and previously claiming under Code L470 should now use individual codes as described above.
22. For codes L475 - L478 inclusive, the unit of test measurement is "per panel". The panel consists of reagent blood cells of known antigenicity usually numbering 8-10 cell types per panel. For a 16 cell panel, the L.M.S. unit value should be doubled.
23. This preamble is intended to apply to everyone using codes L700, L001 to L722 and L800 to L826.
24. The benefits for patient documentation and specimen collection and each test are calculated by multiplying the individual L.M.S. Unit values by 36.8¢.

L700	<b>PATIENT DOCUMENTATION AND SPECIMEN COLLECTION FEE . . . . .</b> L700 applicable on all O.O.P. Laboratory Medicine claims, even though it is not specified on the incoming claim. Is not allowed to a laboratory associated with a clinic in conjunction with an office visit as defined in item 6. May only be claimed with an "L" code other than L701 to L722 and L800 to L826. 1. Limited to 1 per patient, per day. 2. Not allowed to the recipient of a referred sample from another laboratory. 3. Not allowed to the attending physician. 4. Not refundable (in whole or part) to the referring physician or referring laboratory by the laboratory performing the test(s). 5. Not applicable to a patient visit solely to receive instructions or collection containers.	6 \$ 2.208

NUCLEAR MEDICINE—IN VIVO

- Suffix A—use when coding the total benefit.
- Suffix B—use when coding the technical portion only.
- Suffix C—use when coding the professional portion only.

Column T—is the technical benefit for the production of records, radiopharmaceutical agents, apparatus, premises, technical services, administration and secretarial services.

Column P<sub>1</sub>—is the professional benefit for supervision of the procedure, appropriate patient interview and/or examination, correlation of related data, interpretation of results, and provision of a written report. The physician must be present.

Column P<sub>2</sub>—is the professional benefit for interpretation of results and provision of a written report. If the nuclear medicine specialist is not present, the lesser professional benefit (P<sub>2</sub>) should be claimed.

Notes: (1) If quantification or data manipulation is carried out in addition to visual inspection of imaging studies, add 30% to the appropriate professional benefit. Such activity must add significant diagnostic information not available by inspection alone and does not include simple image enhancement techniques such as smoothing, background subtraction, etc. Recording of images on videotape for replay and production of images on the video display of a computer do not in themselves justify the additional benefit.

The benefits for cardiac wall motion studies and calculation of ventricular ejection fraction (Z010 and Z012) already include an allowance for data manipulation and no additional benefit may be claimed.

(2) The total benefit is arrived at by adding T plus P<sub>1</sub> (first code listed e.g. Z006) or by adding T plus P<sub>2</sub> (second code listed, e.g. Z925).

(3) If examination of Brain, Lung, Liver or Spleen is limited to one view, the benefit (T and P<sub>1</sub> and P<sub>2</sub>) is to be reduced by 30%.

(4) The phrase “nuclear medicine specialist” should be interpreted as “nuclear medicine physician”, since not all physicians practising nuclear medicine are certified as specialists in this discipline by the Royal College of Physicians and Surgeons.

# **CLINICAL PROCEDURES ASSOCIATED WITH DIAGNOSTIC NUCLEAR MEDICINE PROCEDURES**

Such procedural benefits are intended for the professional service of placing an instrument or introducing diagnostic radiopharmaceuticals. They are not intended to be

used for simple intravenous injection nor for oral administration. Rather than double listing the procedures and benefits in this part of the schedule, physicians are directed to the following reference points in the schedule.

- a) Intravenous injection for peripheral venography-G376 or G379 on page 120.
- b) Intra-articular injections-G370 on page 119.
- c) Injection into CSF spaces or shunt apparatus-Z801, Z802 or Z821 on page 198.

**NUCLEAR MEDICINE—IN VITRO** (See Radioassays under Laboratory Medicine)

**DIAGNOSTIC RADIOLOGY**

Suffix A — use when coding the total benefit.

Suffix B — use when coding the technical portion only.

Suffix C — use when coding the professional portion only.

Column T — The benefit for radiological examination including the production of radiographs, supplying of contrast media, apparatus, premises, technical services, administration and collection costs.

Column P — The benefit for consultation between radiologist and referring doctor, fluoroscopy, interpretation of radiographs and fluoroscopic findings and supervision of x-ray services by a radiologist.

Private offices and hospital outpatient departments will claim the sum of Columns T plus P.

Radiologists should use Column P as a guideline for negotiating remuneration with hospitals.

Benefits for clinical procedures related to x-ray examinations are listed in the following section, or under Diagnostic and Therapeutic or Surgical Procedures. "Clinical Procedures", in this context, are those by which contrast media are introduced, except oral or rectal administration for study of the alimentary tract, and intravenous injections, which are an integral part of the study, performed by the physician collecting the benefit for the procedure.

If less than minimum number of views are performed, reduce listed benefits by 25%.

**Note:** Reduction of 25% applies to both technical and professional component.

**Interpretations**

1. When a radiologist is asked to x-ray one extremity only, no additional claim should be made for comparison x-rays initiated by the radiologist.

2. Nephrotomography is covered by the listings for intravenous pyelogram and planigram.

3. The radiology listing for "additional views of. . . — one or more" is to include obliques and/or flexion and extension without extra charge.

4. No extra claim should be made for rapid sequence I.V.P.

5. No additional claim is warranted for the use of the image intensifier in diagnostic radiology.

6. Fluoroscopy claims should not be submitted for any examination performed by the radiologist where "fluoroscopy" is generally regarded as an integral part of the examination, e.g. examinations of the G.I. tract, urinary tract, special procedures.

**DIAGNOSTIC RADIOLOGY**

7. "Colon — air contrast" may be claimed when performed according to generally accepted criteria. The colon should be scrupulously prepared. Five to eight full size views of the abdomen should be obtained after fluoroscopically controlled introduction of air and barium.

8. "Oesophagus, stomach and duodenum, double contrast" presupposes the introduction of gas, the use of antifoam agent and a suitable barium mixture.

9. Abdomen and chest studies should not be routinely done and claimed in gastrointestinal examinations.

10. Three or more views of the chest should not be done routinely and claimed when a chest examination is requested.

11. Chest studies should not be routinely done and claimed in mammography cases.

12. Nasal bones or accessory nasal sinuses should not be routinely claimed in skull examination requests.

13. Abdomen and/or pelvis should not be routinely claimed in lumbar spine examination requests.

14. A survey film of the abdomen is a single view. The ordering of additional films should be left to the discretion of the radiologist who should determine which examination is adequate for a specific patient. Obviously, if progress of a long tube is being followed, a survey film is sufficient. If, however, an intestinal obstruction is being followed, a single film is usually inadequate.

15. Conventional films of the spine should not be routinely done and claimed before myelography. The necessity of having plain film studies of the spine prior to interpreting the myelographic studies is obvious. It is not essential, however, that these be done at the institution where the myelogram was done. If they had been done at an outside office, then it is a matter for the radiologist and the referring physician to have the films available. If they cannot be made available to the radiologist, it is an acceptable practice for him to do the required examination of these areas and to claim for them so that they may be available for interpretation along with the myelographic study.

16. Pharynx and oesophagus (cine or videotape) — X106 should not be claimed routinely with X108 and X109 but only when specifically indicated.

**Note:** 1. When coding claims from certified radiologists (33) use the listed codes (i.e. X001-X191) plus the appropriate suffix.

2. When coding claims from non-certified radiologists increase the first numerical digit in the listed codes by 5 (i.e. X501-X691) plus the appropriate suffix.

3. Claims for x-ray services, when referred by an Osteopath, Chiropracist, or Chiropractor to a private x-ray facility are not benefits of O.H.I.P.

4. Claims for x-ray services, when referred by an Osteopath or Chiropractor to a hospital outpatient department are benefits.

## DIAGNOSTIC AND THERAPEUTIC PROCEDURES

- Code** With a few exceptions specifically indicated below, the listed procedural benefits are for the procedure(s) alone. Consultations or visits when such services are rendered, may be claimed in addition to the procedure(s).
- G700** When a procedure(s) is the sole reason for a visit, add \$2.45 per visit for those procedures marked (+) regardless of the number of procedures carried out, G700 may not be claimed when the procedure is done in conjunction with a visit for assessment or consultation by the same physician.

### Schedule Interpretations:

1. If in the course of any visit, a hemoglobin is carried out in the doctor's office, no claim should be made for this service unless it is the sole reason for the visit. Urinalysis may be claimed with or without an associated visit to a doctor's office, if the analysis is comparable to code L253 and includes microscopic examination of the centrifuged specimen.

**Note:** Not allowed to a laboratory associated with a clinic in conjunction with an office visit as defined in item (1).

2. The words "in conjunction with" as they appear above and in the qualifying statements on page 124 of the schedule under the headings of Ophthalmology and Otolaryngology, are not limited in meaning to "at the same time as". In other words, for procedures which are indicated as a result of a visit for assessment or consultation, G700 is not applicable at all and tonography, visual fields and audiometric tests are to be claimed at 60% (the lower benefits now listed) even if the visit and testing procedures are separated at the time. The reduction only applies when the procedure is carried out by the same physician who has seen the patient or in a facility controlled by him, and does not apply to the marked procedures listed under Allergy, Injections or Infusions, or venipuncture.

3. Claims for apex cardiography and E.C.G. may be made when both services are rendered.

4. For the first minor telerradiotherapy procedure rendered to a patient, the doctor may claim the appropriate consultation or assessment in addition to the procedure(s). On subsequent visits, only minor telerradiotherapy plus \$2.45 should be claimed unless additional procedures have been performed or unless there has been a complication or change to a totally unrelated diagnosis. In the first exception, minor telerradiotherapy plus the benefit(s) for additional procedures may be claimed. In the second exception, the appropriate assessment and minor telerradiotherapy may be charged.

5. If a patient presents for an allergy injection and has an acute infectious condition, albeit of the respiratory system, or some other unrelated condition which would have otherwise required a separate office visit, the doctor is entitled to claim for the appropriate assessment as well as the injection. If a patient requires a minor assessment of his allergic condition as well as the allergy injection, the doctor should claim for code G212 only.

DIAGNOSTIC AND THERAPEUTIC PROCEDURES

6. The benefits for respiratory care on page 116 of the schedule under Physician-in-Charge apply per patient treated, i.e., while the physician-in-charge may change during the course of treatment, the benefit formula as set out should be used by the physicians involved as if there was only one physician-in-charge during the treatment program.

7. The \$3.70 benefit under Physical Medicine Therapeutic Procedures means one \$3.70 per hour, per patient regardless of the number of procedures carried out during the hour.

8. Multiple B.C.G. inoculations used for treatment of carcinoma are to be considered experimental and no claims should be made for this service.

9. Some benefits for Diagnostic and Therapeutic Procedures have the technical and professional components listed separately. The technical component includes the salaries of support staff, equipment depreciation or lease costs and supplies. The professional component includes the clinical supervision of the diagnostic facility, interpretation of the test results and a written report.

## OBSTETRICS

1. Obstetrical care includes a complete history and physical examination, routine prenatal visits with necessary hemoglobin estimation; care during labour up to 18 hours, (after 18 hrs. see Preamble item #25.) delivery, post partum care and postnatal office visit.

2. Ordinary immediate care of the newborn is included in the obstetrical benefit and, when the service is rendered, in the benefit for anaesthetist's services. When active resuscitation of the newborn is required by any physician, it may be claimed under codes G521, G522 (Life Threatening Emergency Situation).

3. Illnesses resulting from or associated with pregnancy requiring added home or hospital care should be claimed on a per visit basis.

**Note:** If "False Labour" is the diagnosis, no additional claim should be made.

4. When a pregnant patient visits her physician for a condition unrelated to her pregnancy and apart from her routine scheduled visits, the physician may claim appropriate visit benefits in addition to her obstetrical care.

5. An obstetrician who is called by the family doctor at the time of delivery and performs only a minor part of the delivery, i.e., re-application of forceps, confirmation of position, should claim a consultation. However, if the obstetrician performs a major portion of the delivery, i.e., a forceps rotation, he should complete the delivery and claim \$122.50 (the consultation plus operative delivery benefit). In the first instance, the family doctor may claim his regular delivery benefit but in the second instance, he should only claim the "attendance at labour and attendance at delivery" benefit.

6. If an uncomplicated obstetrical patient is transferred from a family practitioner to an obstetrician for confinement, no consultation or assessment should be claimed since this is not a referral. The listing for "Operative delivery-other than Caesarian section; consultation and procedure" applies to those circumstances where the primary physician requests a more qualified person to deliver the baby because of the complexity of the case.

7. Attendance at labour and attendance at delivery may be claimed when a physician refers an obstetrical patient to another physician for obstetrical care because of complications and does not apply when a patient is transferred for normal care.

8. Medical induction or stimulation of labour should only be claimed when carried out for recognized obstetrical complications and does not qualify for detention.

**OBSTETRICS**

9. When a patient visits a physician for a diagnosis of pregnancy and subsequently attends another physician for full obstetrical care, up to two diagnostic visits may be allowed to the first physician without any reduction of the total benefit for the second physician. Where obstetrical care is divided by transferral between two physicians, the prenatal component of the benefits applicable to each physician shall be allowed on a "fee-for-service" basis provided that neither physician's claim individually exceeds the benefit for prenatal care.

10. When a doctor provides newborn care and also performs a circumcision on the same newborn or infant, both services may be claimed even though the circumcision benefits normally include the pre- and post-operative care of the patient.

11. When an obstetrician routinely transfers all newborns to the care of a paediatrician, the latter should not claim consultation benefits for these "transferrals". If the baby is well, the paediatrician may claim the newborn care in hospital benefit of \$24.50 plus \$24.50 for attendance at maternal delivery (if this service is given). If the baby is sick, the paediatrician may claim for a general assessment and for attendance at maternal delivery (if this service is given) plus daily visits for as long as the paediatrician's services are required. If an obstetrician normally cares for newborns himself or transfers the care of newborns to a general practitioner but refers a newborn to a paediatrician because of the complexity, obscurity or seriousness of the case, the latter may claim a consultation for this service.

12. When a doctor provides prenatal care, attends at labour, assists or administers the anaesthetic at Caesarian Section and visits the patient post-operatively, he is entitled to claim for prenatal care, attendance at labour and attendance at delivery, assistant's or anaesthetist's benefits for Caesarian Section and supportive care while the patient is in hospital.

13. The Preamble applicable to Surgical Procedures (pages 135-139) also applies, where appropriate, to Obstetrics.

## SURGICAL PROCEDURES

### **Preamble:**

FOR DEFINITION OF THE ROLE OF THE REFERRING PHYSICIAN, SEE REFERRING PHYSICIAN SERVICES ON PAGE 13.

FOR DEFINITION OF THE ROLES OF THE ANAESTHETIST, SEE ANAESTHETIST SERVICES ON PAGE 14.

- (1) The surgical benefit (except for those procedures marked (I.O.P.) includes the major pre-operative visit, i.e. consultation, general or specific assessment, if rendered within 60 days of surgery, plus the service rendered in the office (if rendered by the surgeon) immediately prior to surgery when the patient proceeds normally to surgery done by the same surgeon, hospital visits rendered by the surgeon three days prior to surgery, the usual operative procedure, the usual post-operative care rendered by the surgeon while the patient is in hospital, and one office visit for follow-up examination, if necessary. For patients remaining in hospital because of complications, visit benefits may be claimed in addition to the surgical benefit after the second post-operative week. The starting point for calculating the appropriate hospital visit benefit after the second post-operative week is the date of admission if the operating surgeon has admitted the patient or the date of referral if the patient has been referred to the operating surgeon while in hospital.
- (2) When an emergency outpatient surgical procedure (non I.O.P.) is performed in the course of a home or special visit, and the patient is not admitted to hospital, the home or special visit benefit (minor assessment) may be claimed as a premium in addition to the procedural fee.
- (3) When a procedure is performed, a procedural benefit, if listed, should be claimed. Substitution of consultation and/or visit benefits for procedural benefits (except as in paragraph 4), is not in keeping with the intent of the schedule.
- (4) When surgical benefit (non I.O.P.) is less than the consultation benefit and the case is referred, the doctor may claim for the consultation instead of the surgical benefit. However, to avoid the consultation being counted as such under the OHIP limitation rules of one consultation per year, the doctor should claim for the consultation under the surgical procedure nomenclature or code. Since the consultation is replacing a procedural benefit which includes the pre- and post-operative and surgical care, no additional claims beyond the consultation should be made.
- (5) If a doctor performs a minor surgical procedure and during the same visit assesses and treats the patient for another completely unrelated and significant problem involving another body system, the doctor may claim for the procedure as well as for the appropriate assessment.
- (6) Additional claims for biopsies performed when a surgeon is operating in the abdominal or thoracic cavity may be given independent consideration.
- (7) The O.M.A. supports the Royal College of Physicians and Surgeons in its disapproval of itinerant surgery. The surgical benefits, except those marked I.O.P., include the pre- and post-operative care and when a surgeon engages in itinerant surgery, he should be prepared to provide the post-operative care.

**SURGICAL PROCEDURES**

- (8) When a subsequent surgical procedure is necessary for the same condition during the same hospitalization or within normal convalescence, the allowance shall be the full benefit for the major procedure and half the usual benefit(s) for other procedures. This will not apply in cases where the subsequent operations are done by another surgeon. This paragraph applies to staged procedures not specifically covered in the schedule.
- (9) When different operative procedures are done by two different surgeons under the same anaesthesia for different conditions, the benefit will be 100% of the list benefit for each condition. Under these circumstances, the basic assistants' units should not be claimed by either operating surgeon; however time units may be charged.
- (10) As a general rule, when elective bilateral procedures are performed by two surgeons at the same time, one surgeon should claim for the surgical procedures in accordance with paragraph 15 (one stage) and the other surgeon should claim the assistant's benefit.
- (11) Where two surgeons are working together in surgery in which neither a team benefit or other method of claiming is set out in the schedule, the surgeon should identify himself as the operating surgeon and claim accordingly; the surgeon who is assisting him should identify himself as such and claim the assistant's benefit. Where the second or assistant surgeon is brought into the case on a consultation basis, he may, when indicated, claim a consultation as well but should be prepared to justify it on an I.C. basis. If the nature or complexity of a procedure requires more than one operating surgeon each providing a separate service in his own specialized field e.g. one surgeon carries out the ablative part and another surgeon the reconstructive part of the procedure, then each surgeon should claim the listed benefit for his services. This statement applies when the additional procedure(s) are not the usual components of the main procedure. If one surgeon acts solely as an assistant to the other, the former may claim assistant's benefits for his services.
- (12) When a subsequent operation(s) becomes necessary for the same condition because of a complication during the same hospitalization, the full benefit will apply for each procedure.
- (13) When a subsequent operation(s) becomes necessary, for a new condition developing during the same hospitalization, the full benefit will apply for each procedure.
- (14) When a subsequent elective procedure is done for a different condition during the same hospitalization, the benefit for the lesser procedure shall be reduced by 25% unless performed by another surgeon in which case the full benefit will apply.
- (15) In bilateral procedures (including "E" codes), the following benefits will apply (unless otherwise stated).
  - One stage—60% higher than unilateral benefit.
  - Two stage (within the same hospital admission)—75% higher than the unilateral benefit.
  - Two stage (separate hospital admission)—100% higher than the unilateral benefit.

**SURGICAL PROCEDURES**

- (16) When a bilateral procedure (non I.O.P.) is carried out at the same time as another non I.O.P. procedure, the bilateral benefit should be computed in accordance with paragraph 15, divided by one half in accordance with paragraph 18 and added to the total listed benefit for the other procedure.
- (17) Unless otherwise stated, procedural benefits are for unilateral procedures; the formula under paragraph 15 applies to bilateral procedures.
- (18) When more than one operative procedure is performed (uni or bilateral) by the same surgeon at the same time and under the same anaesthetic, the benefit shall be the full benefit for the major procedure; one-half the listed benefit(s) for additional procedures, except where such combined operations are independently specified as items in this Schedule.  
This does not apply in the case where a normal appendix or simple ovarian or paraovarian cyst is removed incidentally during an operation, for which no charge should be made.
- (19) Where a procedure is specified as "Independent Operative Procedure (I.O.P.)", the procedural benefit may be claimed in full. In addition, visit benefits, consultations etc. may be claimed when such services are actually rendered. When an I.O.P. procedure is done in conjunction with other non-I.O.P. procedures, there shall be no charge for the consultation, pre- and post-operative care related to the I.O.P. procedure but the listed I.O.P. benefit may be charged in these circumstances. When multiple or bilateral I.O.P. procedures are performed at the same time by the same doctor, the listed procedural benefits may be claimed in full but the pre- and post-operative benefits should be claimed as if only one procedure had been performed.
- (20) When procedures are specifically listed under Surgical Procedures, plastic surgeons should use these listings rather than applying one of the plastic surgery benefits listed under operations on skin and subcutaneous tissue.
- (21) Skin grafts or pedicle flaps done during a procedure should be claimed for on their own merit (unless specifically listed as being inclusive for that procedure).
- (22) Cosmetic or Aesthetic Surgery: means a service to enhance appearance without being medically necessary such as (a) surgery for correction of facial wrinkles; (b) surgery for eyelid wrinkles (symmetrical and without a functional problem); (c) rhinoplasty for appearances only; and (d) augmentation mammoplasty for symmetrical deficiency without physiological abnormality.
- (23) Reconstructive Surgery: is surgery to restore normal appearance and function to any area altered by disease, trauma or congenital deformity.
- (24) Procedural benefits (non I.O.P.) include the removal of sutures where both services are rendered by the same doctor unless the removal of sutures is done after one office visit for follow up examination has already been provided. When a doctor is entitled to claim for removal of sutures i.e. as outlined in the previous sentence or is a doctor other than the operating surgeon or following an I.O.P. procedure, the benefit for

**SURGICAL PROCEDURES**

removal of sutures or an office visit benefit (if the patient is also assessed) may be claimed but not both.

- (25) No claim should be made for application of plaster associated with fractures or dislocations which have all inclusive benefits or if applied at the time of any surgery. However, if plaster is applied under any other circumstances, the claims for application of plaster should be made in accordance with the schedule listings on page 149.
- (26) The removal of a wire or pin or other device when used for traction or external fixation in the treatment of a fracture or other orthopaedic procedure is to be included in the procedural benefit. Removal of devices used for internal fixation may be charged for in addition to the procedural benefit.
- (27) The benefit for total hip replacement also includes denervation of the hip joint and adductor or abductor tenotomy.
- (28) Where closed irrigation is instituted in a bony cavity, soft tissues or joint during a surgical procedure, add \$36.40 (E550).
- (29) Where a bone graft is required (except for fusions and management of pseudarthrosis) in the course of an operative procedure add \$45.40 (E551) if autogenous bone is taken through a separate incision; add \$36.40 (E552) if autogenous bone is taken through the same incision, and add \$18.20 (E553) if homogenous bone is used.
- (30) When laryngoscopy and bronchoscopy are carried out as combined procedures, the doctor may claim for one or the other but not both.
- (31) No claim should be made for bronchoscopy carried out immediately following thoracic surgery under the same anaesthetic by the same surgeon.
- (32) The benefit for gas endarterectomy of a coronary artery is the same as for coronary endarterectomy.
- (33) The surgical benefit for treating a bleeding duodenal or gastric ulcer will be on an I.C. basis.
- (34) When the laparoscope is used as a means of entrance to perform an intra abdominal procedure, no extra benefit for laparoscopy may be claimed.
- (35) When an exploratory laparotomy is performed followed by a colostomy through another incision in the abdomen, the colostomy should be claimed at 100% and the laparotomy at 50% of the listed benefit.
- (36) The benefits for excision, ligation, injection of haemorrhoids and treatment of intra or perianal condyloma accuminata include anoscopy.

**SURGICAL PROCEDURES**

- (37) No additional claim should be made for nephroscopy when done at the time of pyelolithotomy or nephrolithotomy.
- (38) In a routine surgical approach to the kidney and related procedures, no additional claim should be made for rib resection carried out for access purposes.
- (39) Visit benefits only, as applicable, may be claimed for changing a suprapubic tube.
- (40) A T.U.R. followed within 10 days by a bilateral orchidectomy because of carcinoma of the prostate should be claimed in accordance with paragraph (8) of the Surgical Preamble.
- (41) No claim should be made for pre-cystoscopy dilation of the male urethra unless urethral stricture is the primary diagnosis. No claim should be made for dilation of the female urethra when done at the same time as cystoscopy.
- (42) If a D & C is part of the normal procedure carried out by the surgeon prior to other gynaecological surgery, no extra benefit should be claimed for the D & C. If the D & C is done because of disease or for therapeutic reasons prior to other gynaecological surgery, the D & C should be claimed at one-half of the listed benefit in keeping with paragraph (18) of the Surgical Preamble.
- (43) Tubal ligation benefit regardless of technique-as currently listed in the schedule.
- (44) If culdoscopy is performed as part of a sterilization procedure, no extra claim should be made for the culdoscopy.
- (45) Consultation and visit benefits related to infertility investigations may be claimed in addition to the benefits for a D & C and hysterosalpingogram with the exception of the service provided immediately prior to surgery.
- (46) When debridement of ears under microscopy is carried out for removal of cerumen or for access purposes only, no charge should be made for the debridement. If debridement of ears under microscopy is carried out because of pathology, a claim may be made for this service.
- (47) If claims are being submitted in coded form, the surgeon should add the suffix A to the listed procedural code, the surgical assistant should add the suffix B to the listed procedural code and the anaesthetist should add the suffix C to the listed procedural code.
- (48) Where only one benefit is listed, it shall apply to any physician rendering the service, regardless of specialty.

### FRACTURES AND DISLOCATIONS

#### Preamble

- (a) OPEN REDUCTION shall mean the reduction of a fracture or dislocation by an operative procedure to include the exposure of the fracture or dislocation or intramedullary means of fixation.
- (b) CLOSED REDUCTION shall mean the reduction of a fracture or dislocation by non-operative methods (to include skin traction or K wire or Steinmann's pin for balanced traction.)

\*To the listed basic units for assistants and anaesthetists, add units for time spent (see preamble).

## SURGICAL PROCEDURES

### OPERATIONS ON THE MUSCULOSKELETAL SYSTEM

#### FRACTURES AND DISLOCATIONS—Cont'd

- (c) FOR CLOSED REDUCTION with external skeletal or Roger Anderson type apparatus or percutaneous pinning of a fracture or dislocation, the closed reduction benefit plus 40% (E555) may be claimed.
- (d) NO REDUCTION shall mean the treatment of a fracture or dislocation by any method other than that designated in (a), (b), or (c) above.
- (e) The stated benefit is to cover full treatment including necessary after care up to 2 months, (Includes both a second or subsequent application of a cast when the fracture has been treated by cast application but no reduction and Therapeutic Procedures under G467.) except as in (g) and (h) following.
- (f) In multiple fractures or dislocations, the benefit for the major fracture or dislocation shall be 100%, the benefit for the other fractures or dislocations treated by open reduction shall be 75% and other fractures or dislocations treated in a closed fashion shall be 50%.
- (g) In cases where two or more reductions (closed or open) are performed for one fracture or dislocation by one or more surgeons, the full benefit should be claimed for the final reduction and after care. Previous attempted reduction(s) should be claimed at 50% of the initial reduction (Initial reduction here refers to the listed benefit) and 25% for each subsequent attempted reduction(s).
- (h) When a patient is transferred from an acute care hospital to a chronic or convalescent facility, additional benefits on a chronic care basis shall be allowed to other than the operating surgeon. These benefits shall be based on the chronic care schedule.
- (i) Compound fractures or dislocations requiring extensive debridement—50% over the benefit for reduction (E556).
- (j) Open reduction of compound fracture or dislocation requiring reconstructive procedures, skin shifts, or neurovascular damage requiring reconstruction, etc., to be assessed at double the operative benefit (E557). Open reduction of fracture treated by bone graft use codes R321 to R329.
- (k) Where a patient is transferred to another surgeon for after care of a fracture or dislocation treated by no reduction or closed reduction, the surgeon rendering the initial care should claim 75% of the listed benefit and the surgeon rendering the subsequent care 50% except where otherwise specified. In cases involving open reduction, the percentages should be 80 and 45% respectively.

\*To the listed basic units for assistants and anaesthetists, add units for time spent (see preamble).

#### FRACTURES AND DISLOCATIONS—Cont'd

- (l) In the case of fractures or dislocations or minor avulsion fractures not requiring reduction, visit benefits (use a fracture diagnosis) shall apply unless a specific benefit is listed.
- (m) The benefit for emergency splinting of a fracture in the emergency department should be on the basis of the emergency room visit or the special visit to the hospital whichever applies.
- (n) In case of fractures or fracture dislocations with associated paraplegia, hospital visit benefits may be charged in addition to the surgical benefit after three weeks of post-operative care.

Peterborough, Ontario,

**14198**

IN THE MATTER OF *The Public Vehicles Act*, R.S.O. 1970, Chapter 392, as amended; and

IN THE MATTER OF the application of Trentway Bus Lines Limited heard by the Ontario Highway Transport Board on Monday, the 15th day of May, 1978.

Decision dated: May 24th, 1978.

Reasons for decision dated: May 24th, 1978.

## NOTICE OF MOTION OF TRENTWAY BUS LINES LIMITED

TAKE NOTICE that a motion will be made before the presiding panel of the Ontario Highway Transport Board, pursuant to Section 17 of *The Ontario Highway Transport Board Act*, R.S.O. 1970, Chapter 316, on a date to be fixed by the Honourable Chairman of the said Board, for an Order directing the re-opening of the Application and permitting all parties to represent the evidence and re-argue the issue before a differently constituted panel or for such further order as this Honourable Board may deem just.

The grounds upon which this Notice is based are as follows:

1. The Sitting Panel erred in not approving the transfer of part of public vehicle licence PV 1560 in the original terms, or as amended by the Notice on Page 1518 of THE ONTARIO GAZETTE, without imposing an additional restriction.

2. The Sitting Panel erred in imposing additional restrictions to prevent charter service from the City of Oshawa which restrictions were not contained in the original licence.

3. The Sitting Panel erred in its interpretation of *The Public Vehicle Act* as the right to prescribe additional terms and conditions only applies to the issuance of new licences under Section 4 of the said Act.

4. The Sitting Panel further erred in its interpretation of the public vehicle operating licence No. PV 2703 issued to the respondent Gordon Walter Woodward by assuming that the unscheduled pick-ups and deliveries at residential homes and business premises carried on by the said respondent were not charter operations prohibited in his licence and in imposing a condition to protect his illegal charter operations.

5. And upon such further and other grounds as this Honourable Board may allow.

AND TAKE FURTHER NOTICE that the Applicant will be represented by Frederick R. Hume, Esq., Q.C. or his nominee.

Dated at the City of Toronto, in the Municipality of Metropolitan Toronto, this 14th day of June, 1978.

## The Environmental Assessment Act, 1975

MNR-11

### THE ENVIRONMENTAL ASSESSMENT ACT, 1975

#### Exemption Section 30

Having received a request from the Minister of Natural Resources that an undertaking namely:

The management by the Ministry of Natural Resources of Crown land presently included within forest management units, which is currently exempted until July 1, 1978,

be exempted from the application of the Act for an additional period of eighteen months pursuant to Section 30; and

Having been advised that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the person(s) and property indicated will occur:

The Crown and the public will be interfered with by the delay in planning and implementing of forest management plans which are scheduled to proceed within the period of the exemption.

Having weighed such injury, damage, or interference with the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

I am of the opinion that it is in the public interest to order and do order that the undertaking is exempt from the application of the Act for the following reasons:

1. The Ministry of Natural Resources requires a further period of time prior to any application of environmental assessment procedures to the undertaking in order to complete revisions to its overall forest policy direction. The revisions include:

—a review of all aspects of forest regeneration and development of definitive policy guidelines on the size of clear-cuts,

—the completion of the study on the privatization of forest management in Ontario;

2. The Ministry requires additional time to establish refined benefit-cost figures resulting from the application of possible guidelines derived from an environmental assessment of the undertaking;
3. The undertaking is an ongoing activity of the Ministry of Natural Resources and is an integral part of the economy of the Province. The application of the Act before December 31, 1979 in the absence of an approval under the Act would result in the halting of forest management in Ontario. Therefore the interference which would be caused would be undue;

This exemption is subject to the following terms and conditions:

1. This exemption expires on December 31, 1979;
2. A copy of any plan with respect to part of this undertaking shall, before the implementation of the plan commences or within 30 days of this order being issued, be made available to the public at a local office of the Ministry of Natural Resources and a

copy shall also be sent to the Environmental Approvals Branch of the Ministry of the Environment to be kept with the records of environmental assessments and made available to the public in the same way as such records;

3. Where the carrying out of the undertaking requires that some activity, for which an environmental assessment has been done and an approval to proceed received, be conducted, that activity shall be carried out in accordance with the environmental assessment and approval to proceed.

This order comes into force and has effect on and after the date upon which it is signed.

Dated at Toronto, this 27th day of June, 1977.

GEORGE R. MCCAGUE  
Minister of the Environment.

## THE ENVIRONMENTAL ASSESSMENT ACT, 1975

### Exemption Section 30

Having received a request from the Minister of Natural Resources that an undertaking namely:

The activity of implementing Provincial Parks Master Plans with respect to the following provincial parks:

- |                   |                    |
|-------------------|--------------------|
| 1. Killbear       | 6. Short Hills     |
| 2. Quetico        | 7. Peter's Woods   |
| 3. Kakabeka Falls | 8. Carillon        |
| 4. Neyes          | 9. Charleston Lake |
| 5. Point Farms    | 10. Petroglyphs    |

be further exempted from the application of the Act pursuant to Section 30; and

Having been advised that the aforementioned parks were included in Schedule "A" of Exemption Order MNR-5, published in THE ONTARIO GAZETTE, November 13, 1976; and

Having been advised that these Master Plans were approved by the Minister of Natural Resources prior to the termination of the above mentioned Exemption Order on July 31, 1977, and except for printing delays, the required copies of the Master Plans would have been submitted to the Ministry of the Environment and made available to the public at a local office of the Ministry of Natural Resources, before the stated deadline in Order MNR-5; and

Having been advised that copies of the aforementioned Master Plans have been submitted to the Ministry of the Environment and made available to the public at the local office of the Ministry of Natural Resources; and

Having been advised that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

The injury and damage caused to the Crown and the public, by the delay in implementing these Master Plans, for which the park master planning process, which includes public participation, has already been completed, would be undue.

Having weighed such injury, damage, or interference with the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

I am of the opinion that it is in the public interest to order and do order that the undertaking is further exempt from the application of the Act for the following reasons:

1. The interference, caused by the application of the Act to the implementation of these Master Plans for which planning and approval by the Minister of Natural Resources had been completed prior to the expiry of MNR-5, would be undue and not in the public interest;
2. The protection, conservation and wise management of the environment will be sufficiently provided for in the interim while the Ministry of Natural Resources is revising their park planning procedures to comply with the requirements of The Environmental Assessment Act by the enforcement and observation of:

The Provincial Parks Act

The Historical Parks Act

The Wilderness Areas Act

This order comes into force and has effect on and after the date upon which it is signed.

Dated at Toronto, this 27th day of June, 1978.

Minister of the Environment.

Tetracycline 250mg Inj Pd	014729	Achromycin	LED	1.3500
	024511	Tetracycln	PFI	1.4300

**Note**

The use of tetracyclines during tooth development (last half of pregnancy, infancy and childhood to the age of 8 years) may cause permanent tooth discoloration (yellow-gray-brown). This reaction is more common during long-term use of the tetracyclines, but has been observed following short-term courses. Enamel hypoplasia has also been reported. Tetracyclines should therefore not be used in this age group unless other antibiotics are not likely to be effective or are contraindicated.

#### Hypertension: Fixed Combination Drugs

A fixed combination drug is not indicated for initial therapy of hypertension. Hypertension requires therapy titrated to the individual patient. Recognizing this, if the fixed combination drug meets that titrated dose of its individual components, its use may be more convenient in the management of the individual patient. The treatment of hypertension is not static, it must be re-evaluated as conditions in each patient warrant. Adapted from F-D-C Reports, Sept. 11, 1972, p 8 (FDA Cardiovascular Advisory Committee).

#### Hypertension: Fixed Combination Drugs

A fixed combination drug is not indicated for initial therapy of hypertension. Hypertension requires therapy titrated to the individual patient. Recognizing this, if the fixed combination drug meets that titrated dose of its individual components, its use may be more convenient in the management of the individual patient. The treatment of hypertension is not static, it must be re-evaluated as conditions in each patient warrant. Adapted from F-D-C Reports, Sept. 11, 1972, p 8 (FDA Cardiovascular Advisory Committee).

## Ministry of Labour

### NOTICE OF INTENT TO REGULATE LEAD, ASBESTOS AND SILICA, AND OCCUPATIONAL HEALTH HAZARDS

The Ministry of Labour intends to regulate general occupational health hazards and the exposures of employees to the substances: lead, asbestos and silica. Interim drafts of these regulations are set out below. Comments are invited. These comments will be reviewed, together with those from external scientific experts and other Provincial Ministries. If any concerns remain to be addressed, further consultations will take place. The proposed regulations will be subsequently published in *The ONTARIO GAZETTE*.

An impact study on the economic effects of regulation hazards to occupational health and lead, asbestos and silica, is being developed. Any comments on this subject should be included separately from your comments on the interim draft regulations.

The following questions could be considered in preparing your comments:

#### *Regulations Respecting Occupational Health Hazards*

1. Will the scheme of progressive control measures described in section 4 adequately control, limit, or reduce an exposure?

2. Are the medical examination program, the personal exposure record program, and the health record program sufficiently comprehensive?
3. Do you agree with the process described in section 7 to establish a monitoring program?

#### *Regulations Respecting Designated Substances*

4. Do you agree with the exposure limits for the substance?
5. Do you agree with the respiratory equipment requirements?
6. Do you agree with the requirements for cleanliness in the workplace?
7. Do you agree that the warning notice to be posted is adequate?
8. Do you agree with the medical examination requirements?

Comments should be submitted within 60 days of the date of the publication of this notice to:

- (b) "ceiling exposure limit" means the maximum exposure to an airborne concentration of a regulated or a toxic substance or a physical agent that is not to be exceeded for an instant;
- (c) "engineering controls" mean controlling, limiting or reducing the exposure to a regulated or a toxic substance or a physical agent by ventilation, isolation, enclosure and design of the work place, plant and equipment or one or more of such means;
- (d) "physical agent" means heat, humidity, light, noise, laser, microwave energy, ultra-violet or ionizing radiation, exposure to which is limited or proscribed under a regulation, or a limit for exposure thereto is adopted as a criteria or guide under this regulation;
- (e) "regulated substance" means a toxic substance the exposure to which is limited or proscribed under a regulation;
- (f) "short-term exposure limit" means the maximum exposure to an airborne concentration of a regulated or a toxic substance or a physical agent in a period not exceeding fifteen minutes provided that such maximum exposure does not occur more than four times in a day at intervals of not less than sixty minutes and further provided that the time-weighted average exposure limit is not exceeded;
- (g) "time-weighted average exposure limit" means the maximum average exposure in a 40 hour work week to an airborne concentration of a regulated or a toxic substance or a physical agent determined as prescribed by section 2;
- (h) "toxic substance" means a biological or chemical substance, a mixture or combination of such substances in respect of which a limit for exposure thereto is adopted as a criteria or guide under this regulation;
